Home Page

On top we want CMI logo followed by Student Blogs in a cool font. Then a menu for the other pages on right hand side (and collapses to hamburger on smaller screens). We want 3 columns (on larger screens and 1 after another on smaller) that are Selected Posts, New Posts and Most Read posts. Each should have like 4-5 posts ish. The posts should be title + subtitle or first 80

or so characters and have the author profile pic and name below the subtitle in the right hand corner of the card.

Finally, the footer is divided and should have a disclaimer on one side and “For the Students, By The Students, Of the Students” on the other side.

About

Basically a blog post but not listed on the site and a different page.

Ana Jaramillo '27
Hi! My name is Ana Jaramillo and I am studying Mechanical Engineering and Biology. I am originally from Miami, FL but was raised in Bogotá, Colombia. On Campus, I am part of the Caltech Women's soccer team, vice president of the Caltech Hispanic and Latino Association (CHLA), and secretary of Engineer Without Borders (EWB). I love spending my free time with my friends, on the beach, or watching movies.

Bisrat Kassahun '27
Hello there (general kenobi)! I'm Bis, a junior studying Physics from the rocket-ridden land of Merritt Island, Florida. I'm Page House's ex-Athman and am also affiliated with Ricketts House, where I find there are too many events to keep track of and tons of fun things to do throughout the week. I run for the Caltech Track and Field team, keeping me busy basically year-round between house activities, athletics, and extracurriculars. If I'm not in any social space, you'll probably find me rewatching Star Wars Episodes I-III (my undisputed favorites) or reading some philosopher that I found to be the flavor of the week.

Sorta something like this (but maybe give the cards a nice border (perhaps chosen by the authors?))

Sort of borders + 1 pastel icon like here

Course 11-6

Biography

I'm Victor!

I'm a '27 living on Putz in East Campus but I lived 2 happy years on B4 in Burton Conner!

I was born in Ventura, California but grew up in Camarillo, California in the aptly named Pleasant Valley (named due to idyllic year-round temperatures and nearly cloudless conditions). People (my dad) would recall horror stories about the weather outside of coastal Southern California but contrary to expectations I have come to relish Cambridge's seasonal diversity.

I'm a Course 11-6 (Urban Planning + CS)! Course 11-6 was partly why I committed to MIT, and my suburban upbringing led me to urban planning (so much for idyllic weather if you spend hours everyday behind the wheel). That's why I love Cambridge: so many places to go, and so many ways to get there easily (my favorites being biking and walking).

In my free time, I enjoy reading, writing, learning languages (I am not a 24-2; I keep the urges at bay), playing Smash Ultimate, playing music (VGO [Video Game Orchestra], Mariachi, jams, etc.), writing & arranging music, (mostly indoor) rock climbing, biking, and going on absurdly long walks.

MIT Students Visit Caltech and UCLA

June 6, 2026 in [How to Boston and Beyond](#), [How to Human](#), [People & Identities](#), [Personal Travel](#), [View all](#)

I'm always thrilled to have visitors, people to show around, to share a place familiar to me, to rediscover and see new things in those places. This past weekend, I've traveled hundreds of miles in the LA area to introduce my friend Peyton to parts of my world.

Peyton is one of my friends from Putz, my living community in East Campus, and this summer he's interning at JPL (the Jet Propulsion Laboratory) doing research on newly formed stars. He had been crashing at Caltech in Blacker Hovse (a Caltech undergraduate dorm) the past few weeks with a friend of a friend, Blake, a mechanical engineering frosh at Caltech living in Blacker Hovse, who met several MIT students through the annual (unofficial) MIT-Caltech exchange.

some cpw events i'll be at

After jamming to various Blues and Bossa tunes, Blake on double bass, Peyton and I on two separate pianos, we walked over to the adjoined Ricketts House (another one of Caltech's South Houses) for their open mic night event, which was so fun and whimsical and impressive and entirely absurd all at once. As we watched the student groups, Peyton and I remarked how it reminded us of the student bands and their performances at East Campus. Off the top of my head, last year we had **Fred Fest**, **Steer Roast**, and **Emo Prom** (two student bands, Concepts of a Band and Putz Up! performed in Blacklight Lounge on a hall called 41West in East Campus), all events where East Campus bands featured prominently.

Blake's fellow Moles (the demonym for Blacker House residents) had a bit where they all dressed as Pitbull and Kesha and sang Timber. I really enjoyed how culturally vibrant their living communities are and it's really inspiring to see such a close analog to East Campus exist and thrive independently on the other side of the country. Well, mostly independently; as I've mentioned, there are exchanges between us :).

After the final song and mosh pit at 2:10 AM, Blake graciously offered to let me stay the night in his room despite having just met me. For a night, his tiny single (smaller than any dorm room I've seen at MIT) was a triple.

The following morning, Peyton and I said bye to Blake as he headed out to lab and we headed off to my high school friend Dylan's apartment in Westwood near UCLA. There, I introduced Peyton to Dylan, a junior in electrical engineering, and my other friend Paxton, a junior in mechanical engineering. Together, we cooked and ate a scrumptious vegan meal including brown rice, daal, aromatic salad, fried okra, jamaica, and berry smoothies. We realized we dilly-dallied a bit too much however and rushed out of the house to drive to Hollywood to see a film at the Chinese Theater called *La Hija Condor* (The Condor Daughter).

Dylan is ethnically Bolivian and has taken several courses in Kichwa, the predominant Amerindian language of the Andes from Ecuador to Peru to Bolivia, and he had the opportunity to meet the director prior to the screening! I'm so glad he invited us; the film was
